JOURNAL OF SPACECRAFT AND ROCKETS
Vol. 35, No. 6, November–December 1998

1998 *Journal of Spacecraft and Rockets* Index

How to Use the Index

In the Subject Index, pages 860–865, each technical paper is listed under a maximum of three appropriate headings. Note the number in boldface type following each paper title, and use that number to locate the paper in the Chronological Index. The Author Index, pages 866 and 867, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 868–872, lists all papers by their unique code numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the "CP" or conference volume number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 1998, that paper also will appear in the Chronological Index. Authors of Comments also are listed in the Author Index. The Book Review Index, page 872, lists the books reviewed during 1998, the author, publisher, and reviewer, and the volume, issue number, and page on which the review appeared.

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Navier–Stokes Analysis of Subsonic Flowfields over a Missile Configuration **A98-022**
Iterative Learning-Based Extraction of Aerobomb Drag **A98-040**
Experimental Investigation of Super- and Hypersonic Jet Interaction on Missile Configurations **A98-048**
Flow Visualization on Lower Surfaces of Wave Rider Configurations at Mach 5.5 **A98-064**
Comparative Similarity Analysis of Hypersonic Rarefied Gas Flows Near Simple-Shape Bodies **A98-070**
Waverider Aerodynamics and Preliminary Design for Two-Stage-to-Orbit Missions, Part 1 **A98-073**
New Three-Dimensional Inverse Method for High-Speed Vehicle Design **A98-076**
Effects of Mach Number on Supersonic Wraparound Fin Aerodynamics **A98-116**
Evaluating Aerodynamic Characteristics of Wind-Tunnel Models Produced by Rapid Prototyping Methods **A98-118**
Computational Prediction of Pitch Damping for Supersonic Blunt Cones **A98-132**

Aeroelasticity and Aeroservoelasticity

Integrated Solution for Computational Static Aeroelasticity of Rockets **A98-096**

Aerospace Plane

Waverider Aerodynamics and Preliminary Design for Two-Stage-to-Orbit Missions, Part 2 **A98-074**
Launch Vehicle Concept with Tandem Staging and Air Collection **A98-103**

Configuration Design

Waverider Aerodynamics and Preliminary Design for Two-Stage-to-Orbit Missions, Part 2 **A98-074**
New Three-Dimensional Inverse Method for High-Speed Vehicle Design **A98-076**

Flight Mechanics

Iterative Learning-Based Extraction of Aerobomb Drag **A98-040**

Energy

Photovoltaic Power

Revised Estimates of Photochemically Deposited Contamination on the Global Positioning System Satellites **A98-020**

Solar Power

Construction Criteria for a Large Space Structure in Low Earth Orbit **A98-007**

Fluid Dynamics

Boundary Layers and Heat Transfer—Laminar

Evaluation of Engineering Heat Transfer Prediction Methods in High-Enthalpy Flow Conditions **A98-016**
Numerical Predictions of Hypersonic Flow over a Two-Dimensional Compression Ramp **A98-037**
Improved Fay–Riddell Procedure to Compute the Stagnation Point Heat Flux **A98-063**
Analytic Corrections to Computational Heating Predictions Accounting for Changes in Surface Catalysis **A98-069**

Boundary Layers and Heat Transfer—Turbulent

Exploring the Validity of the Spalart–Allmaras Turbulence Model for Hypersonic Flows **A98-021**

Boundary-Layer Stability and Transition

Shuttle Orbiter Experimental Boundary-Layer Transition Results with Isolated Roughness **A98-041**

Computational Fluid Dynamics

High-Altitude Capsule Aerodynamics with Real Gas Effects **A98-002**
Forebody Precompression Effects and Inlet Entry Conditions for Hypersonic Vehicles **A98-004**
Influence of Crossflow and Turbulence on Vortex Flow Around a Supersonic Missile **A98-005**
Flowfield over Bulbous Heat Shield in Transonic and Low Supersonic Speeds **A98-014**
Euler Solution of Axisymmetric Jets in Supersonic External Flow **A98-015**
Exploring the Validity of the Spalart–Allmaras Turbulence Model for Hypersonic Flows **A98-021**
Navier–Stokes Analysis of Subsonic Flowfields over a Missile Configuration **A98-022**
Lateral Jet Control of a Supersonic Missile: Computational and Experimental Comparisons
Potential Flow Solutions with Wakes over an Ogive Cylinder **A98-045**
Waverider Aerodynamics and Preliminary Design for Two-Stage-to-Orbit Missions, Part 1 **A98-073**
New Three-Dimensional Inverse Method for High-Speed Vehicle Design **A98-076**
Three-Dimensional Modeling, Estimation, and Fault Diagnosis of Spacecraft Air Contaminants **A98-089**
Navier–Stokes Predictions of the Individual Components of the Pitch-Damping Sum **A98-094**
Numerical Simulation of a Supersonic Base-Bleed Projectile with Improved Turbulence Modeling **A98-095**
Three-Dimensional Flow Computation Around a Projectile Overtaking a Preceding Shock Wave **A98-097**

Exploring the Validity of the Spalart–Allmaras Turbulence Model for Hypersonic Flows **A98-021**

Boundary-Layer Stability and Transition

Shuttle Orbiter Experimental Boundary-Layer Transition Results with Isolated Roughness **A98-041**

Computational Fluid Dynamics

High-Altitude Capsule Aerodynamics with Real Gas Effects **A98-002**
Forebody Precompression Effects and Inlet Entry Conditions for Hypersonic Vehicles **A98-004**
Influence of Crossflow and Turbulence on Vortex Flow Around a Supersonic Missile **A98-005**
Flowfield over Bulbous Heat Shield in Transonic and Low Supersonic Speeds **A98-014**
Euler Solution of Axisymmetric Jets in Supersonic External Flow **A98-015**
Exploring the Validity of the Spalart–Allmaras Turbulence Model for Hypersonic Flows **A98-021**
Navier–Stokes Analysis of Subsonic Flowfields over a Missile Configuration **A98-022**
Lateral Jet Control of a Supersonic Missile: Computational and Experimental Comparisons
Potential Flow Solutions with Wakes over an Ogive Cylinder **A98-045**
Waverider Aerodynamics and Preliminary Design for Two-Stage-to-Orbit Missions, Part 1 **A98-073**
New Three-Dimensional Inverse Method for High-Speed Vehicle Design **A98-076**
Three-Dimensional Modeling, Estimation, and Fault Diagnosis of Spacecraft Air Contaminants **A98-089**
Navier–Stokes Predictions of the Individual Components of the Pitch-Damping Sum **A98-094**
Numerical Simulation of a Supersonic Base-Bleed Projectile with Improved Turbulence Modeling **A98-095**
Three-Dimensional Flow Computation Around a Projectile Overtaking a Preceding Shock Wave **A98-097**

Effect of Magnetic Field on the Structure of High-Speed Flows A98-100
Aerodynamic Interference for Hypersonic Missiles at Low Angle of Attack A98-117
Flush Air Data System Calibration Using Numerical Simulation A98-127
Computational Prediction of Pitch Damping for Supersonic Blunt Cones A98-132

Hypersonic Flow

Heat Flux on Partially Catalytic Surfaces in Hypersonic Flows A98-001
High-Altitude Capsule Aerodynamics with Real Gas Effects A98-002
Pressure Measurements on a Mach 5 Sabot During Discard A98-003
Forebody Precompression Effects and Inlet Entry Conditions for Hypersonic Vehicles A98-004
Evaluation of Engineering Heat Transfer Prediction Methods in High-Enthalpy Flow Conditions A98-016
Exploring the Validity of the Spalart–Allmaras Turbulence Model for Hypersonic Flows A98-021
Numerical Predictions of Hypersonic Flow over a Two-Dimensional Compression Ramp A98-037
Shuttle Orbiter Experimental Boundary-Layer Transition Results with Isolated Roughness A98-041
Improved Fay–Riddell Procedure to Compute the Stagnation Point Heat Flux A98-063
Flow Visualization on Lower Surfaces of Wave Rider Configurations at Mach 5.5 A98-064
Chemical Nonequilibrium Stagnation Ablation Analysis of MUSES-C Superorbital Re-Entry Capsule A98-065
Comparative Similarity Analysis of Hypersonic Rarefied Gas Flows Near Simple-Shape Bodies A98-070
Hypersonic Blunt-Body Flows in Hydrogen–Neon Mixtures A98-114
Aerodynamic Interference for Hypersonic Missiles at Low Angle of Attack A98-117
Flush Air Data System Calibration Using Numerical Simulation A98-127

Inlet, Nozzle, Diffuser, and Channel Flows

Hybrid Euler/Particle Approach for Continuum/Rarefied Flows A98-043

Jets, Wakes, and Viscid-Inviscid Flow Interactions

Euler Solution of Axisymmetric Jets in Supersonic External Flow A98-015
Hybrid Euler/Particle Approach for Continuum/Rarefied Flows A98-043
Experimental Investigation of Super- and Hypersonic Jet Interaction on Missile Configurations A98-048

Plasmadynamics and MHD

Sheath Structure Around a High-Voltage Body in Magnetized Nonflowing Ionospheric Plasma A98-011
Ionization Around a High-Voltage Body in Magnetized Nonflowing Ionospheric Plasma A98-012
Effects of Rocket Engine on Single-Stage-to-Orbit Vehicle A98-019
Effect of Magnetic Field on the Structure of High-Speed Flows A98-100
Arcing on Aluminum Anodized Plates Immersed in Low-Density Plasmas A98-126

Rarefied Flows

High-Altitude Capsule Aerodynamics with Real Gas Effects A98-002
Hybrid Euler/Particle Approach for Continuum/Rarefied Flows A98-043
Improved Satellite Drag Coefficient Calculations from Orbital Measurements of Energy Accommodation A98-044
Comparative Similarity Analysis of Hypersonic Rarefied Gas Flows Near Simple-Shape Bodies A98-070
Application of Numerical Multizone Approach to the Study of Satellite Thruster Plumes A98-080
Detailed Computation of Ultraviolet Spectra in Rarefied Hypersonic Flow A98-102

Separated Flows

Navier–Stokes Analysis of Subsonic Flowfields over a Missile Configuration A98-022
Numerical Predictions of Hypersonic Flow over a Two-Dimensional Compression Ramp A98-037

Shock Waves and Detonations

Three-Dimensional Flow Computation Around a Projectile Overtaking a Preceding Shock Wave A98-097

Subsonic Flow

Improved Methodology for Axial Force Prediction at Angle of Attack A98-023
Potential Flow Solutions with Wakes over an Ogive Cylinder A98-045
Review and Extension of Computational Methods for Noncircular Cross-Sectional Weapons A98-093

Supersonic Flow

Pressure Measurements on a Mach 5 Sabot During Discard A98-003
Influence of Crossflow and Turbulence on Vortex Flow Around a Supersonic Missile A98-005
Improved Methodology for Axial Force Prediction at Angle of Attack A98-023
Experimental Investigation of Super- and Hypersonic Jet Interaction on Missile Configurations A98-048
Viscous/Inviscid Interactions of the Forebody Flowfield of an Airbreathing Hypersonic Vehicle A98-072
Review and Extension of Computational Methods for Noncircular Cross-Sectional Weapons A98-093
Effects of Mach Number on Supersonic Wraparound Fin Aerodynamics A98-116

Transonic Flow

Flowfield over Bulbous Heat Shield in Transonic and Low Supersonic Speeds A98-014
Improved Methodology for Axial Force Prediction at Angle of Attack A98-023
Launch Vehicle Self-Sustained Oscillation from Aeroelastic Coupling Part 1: Theory A98-058
Launch Vehicle Self-Sustained Oscillation from Aeroelastic Coupling Part 2: Analysis A98-059
Review and Extension of Computational Methods for Noncircular Cross-Sectional Weapons A98-093

Unsteady Flows

Three-Dimensional Flow Computation Around a Projectile Overtaking a Preceding Shock Wave A98-097

Viscous Non-Boundary-Layer Flows

Effects of Mach Number on Supersonic Wraparound Fin Aerodynamics A98-116

Guidance, Control, and Dynamics Technology

Aircraft Stability and Control

Computational Prediction of Pitch Damping for Supersonic Blunt Cones A98-132

Artificial Intelligence

Approach to Space Shuttle Main Engine Health Monitoring Using Plume Spectra A98-129

Astrodynamics

Orbit Plane Control Strategies for Inclined Geosynchronous Satellite Constellation A98-006
Auto-Attitude Stabilization of a Twin-Satellite System Through Very Short Tethers A98-032
Analysis of the TOPEX/Poseidon Operational Orbit: Observed Variations and Why A98-034
Improved Satellite Drag Coefficient Calculations from Orbital Measurements of Energy Accommodation A98-044
Trajectory Optimization Using Eccentric Longitude Formulation A98-051
Low-Thrust Eccentricity-Constrained Orbit Raising A98-052
Direct Approach for Computing Near-Optimal Low-Thrust Earth-Orbit Transfers A98-081
Orbit Raising with Low-Thrust Tangential Acceleration in Presence of Earth Shadow A98-082
Low-Thrust Inclination Control in Presence of Earth Shadow A98-083
Spacecraft Momentum Dumping Using Gravity Gradient A98-110

Avionics Systems

Multipath Effects on International Space Station Global Positioning System Performance A98-136

Computer Systems

Performance Analysis for International Space Station Wireless Local Area Network A98-135

Control Theory

Iterative Learning-Based Extraction of Aerobomb Drag A98-040

Dynamics

Orbit Plane Control Strategies for Inclined Geosynchronous Satellite Constellation A98-006
Computational Dynamic Analysis of Extravehicular Activity: Large-Mass Handling A98-035

Engine Control

Optimal Performance of a Dual-Fuel Single-Stage Rocket A98-104

Flight Mechanics

Comment on "Six-Degree-of-Freedom Entry Dispersion Analysis for the METEOR Recovery Module" A97-051
Reply by the Authors to T. McCusker A97-051
Orbit Plane Control Strategies for Inclined Geosynchronous Satellite Constellation A98-006
Trajectory Optimization Using Eccentric Longitude Formulation A98-051
Low-Thrust Eccentricity-Constrained Orbit Raising A98-052
Entry Guidance for the X-33 Vehicle A98-054
Magnus Effects on Stability of Wraparound-Finned Missiles A98-075
Orbit Raising with Low-Thrust Tangential Acceleration in Presence of Earth Shadow A98-082
Low-Thrust Inclination Control in Presence of Earth Shadow A98-083
Navier–Stokes Predictions of the Individual Components of the Pitch-Damping Sum A98-094

Information Processing

Approach to Space Shuttle Main Engine Health Monitoring Using Plume Spectra A98-129

Launch Vehicle Dynamics

Launch Vehicle Self-Sustained Oscillation from Aeroelastic Coupling Part 1: Theory A98-058
Launch Vehicle Self-Sustained Oscillation from Aeroelastic Coupling Part 2: Analysis A98-059

Launch Vehicle Guidance and Control

Minimum Heating Entry Trajectories for Reusable Launch Vehicles A98-105
Launch Vehicle Trajectories with a Dynamic Pressure Constraint A98-120

Missile Dynamics

Fin Damage and Mass Offset for Kinetic Energy Projectile Spin/Pitch Lock-In A98-047
Optimal External Configuration Design of Unguided Missiles A98-050
Magnus Effects on Stability of Wraparound-Finned Missiles A98-075
Launch Detection Satellite System Engineering Error Analysis A98-078
Aerodynamic Interference for Hypersonic Missiles at Low Angle of Attack A98-117

Missile Guidance and Control

Aerodynamic Performance of Supersonic Missile Body- and Wing Tip-Mounted Lateral Jets A98-046

Navigation

Analysis of the TOPEX/Poseidon Operational Orbit: Observed Variations and Why A98-034
Optimization of Global Positioning System Usage for Low-Power Satellites A98-111

Optimization Techniques

Optimal External Configuration Design of Unguided Missiles A98-050
Optimization of Global Positioning System Usage for Low-Power Satellites A98-111
Minimum Heat Input Optimal Skip Entry into Venus Atmosphere A98-121
Real-Time Optimal Attitude Estimation Using Horizon Sensor and Magnetometer Data A98-122

Software Technology

Efficient Jitter Analysis for Spacecraft A98-039

Spacecraft Dynamics

Construction Criteria for a Large Space Structure in Low Earth Orbit A98-007
Orbital and Configuration Influences on Spacecraft Dynamic Response A98-029
Auto-Attitude Stabilization of a Twin-Satellite System Through Very Short Tethers A98-032
Efficient Jitter Analysis for Spacecraft A98-039
Minimum Heat Input Optimal Skip Entry into Venus Atmosphere A98-121

Spacecraft Guidance and Control

Auto-Attitude Stabilization of a Twin-Satellite System Through Very Short Tethers A98-032
Low-Thrust Eccentricity-Constrained Orbit Raising A98-052
Entry Guidance for the X-33 Vehicle A98-054
Application of Numerical Multizone Approach to the Study of Satellite Thruster Plumes A98-080
Orbit Raising with Low-Thrust Tangential Acceleration in Presence of Earth Shadow A98-082
Low-Thrust Inclination Control in Presence of Earth Shadow A98-083
Analysis and Design of the Aerocapture Tether with Accounting for Stochastic Errors A98-106

State Estimation

Precision Orbit Determination for the Geostat Follow-On Satellites A98-053
Launch Detection Satellite System Engineering Error Analysis A98-078
Three-Dimensional Modeling, Estimation, and Fault Diagnosis of Spacecraft Air Contaminants A98-089
Real-Time Optimal Attitude Estimation Using Horizon Sensor and Magnetometer Data A98-122
Flush Air Data System Calibration Using Numerical Simulation A98-127

Structural Control

Control of Thermal Deformations of Spherical Mirror Segment A98-026
Motion Control of Adaptive Space Structures Based on Artificial Potential Method A98-079

System Identification

Autonomous Modal Identification of the Space Shuttle Tail Rudder A98-027

Trajectory Optimization

Comment on "Six-Degree-of-Freedom Entry Dispersion Analysis for the METEOR Recovery Module" A97-051
Reply by the Authors to T. McCusker A97-051
Trajectory Optimization Using Eccentric Longitude Formulation A98-051
Entry Guidance for the X-33 Vehicle A98-054
Optimality of the Heating-Rate-Constrained Aerocruise Maneuver A98-057
Direct Approach for Computing Near-Optimal Low-Thrust Earth-Orbit Transfers A98-081
Minimum Heating Entry Trajectories for Reusable Launch Vehicles A98-105
Launch Vehicle Trajectories with a Dynamic Pressure Constraint A98-120

Interdisciplinary Topics

Aerospace Management

Greatest Critical Difference Statistics in k-out-of-n Reliability Structures A98-038

Aerospace Technology Utilization

Metric for Systems Evaluation and Design of Satellite-Based Internet Links A98-010

Analytical and Numerical Methods

Sheath Structure Around a High-Voltage Body in Magnetized Nonflowing Ionospheric Plasma A98-011
Ionization Around a High-Voltage Body in Magnetized Nonflowing Ionospheric Plasma A98-012
Risk Assessment Consequences of the Lognormal Distribution of Midtropospheric Wind Changes A98-018
Spacecraft Plasma Environment and Contamination Simulation Code: Description and First Tests A98-033

Atmospheric and Space Sciences

Instrument for Measuring Spacecraft Potential A98-009
Spin Rate of Galileo Probe During Descent into the Atmosphere of Jupiter A98-013
Effects of Rocket Engine on Single-Stage-to-Orbit Vehicle A98-019

Design Considerations for Venus Microprobes A98-036
Improved Satellite Drag Coefficient Calculations from Orbital Measurements of Energy Accommodation A98-044
Development of a Renewable Atomic Oxygen Sensor for Low Earth Orbit A98-068
Semiempirical Method for Predicting Single Event Effect Rates Due to Direct Ionization A98-088
Results from the Space Technology Research Vehicle 1a Atomic Oxygen Experiment A98-101
Spacecraft Potential Control by the Plasma Source Instrument on the POLAR Satellite A98-131

Human Factors

Computational Dynamic Analysis of Extravehicular Activity: Large-Mass Handling A98-035

Reliability, Maintainability, and Logistics Support

Greatest Critical Difference Statistics in *k*-out-of-*n* Reliability Structures A98-038

Research Facilities and Instrumentation

Hypersonic Blunt-Body Flows in Hydrogen–Neon Mixtures A98-114

Safety

Risk Assessment Consequences of the Lognormal Distribution of Midtropospheric Wind Changes A98-018
Three-Dimensional Modeling, Estimation, and Fault Diagnosis of Spacecraft Air Contaminants A98-089

Sensor Systems

Estimation of Entry Parameters from Heat Flux Measurements A98-090

Launch Vehicle and Missile (LV/M) Technology

Aerodynamics

Spin Rate of Galileo Probe During Descent into the Atmosphere of Jupiter A98-013
Flowfield over Bulbous Heat Shield in Transonic and Low Supersonic Speeds A98-014
Euler Solution of Axisymmetric Jets in Supersonic External Flow A98-015
Technique to Reduce Yaw and Jump of Fin-Stabilized Projectiles A98-017
Lateral Jet Control of a Supersonic Missile: Computational and Experimental Comparisons A98-024
Potential Flow Solutions with Wakes over an Ogive Cylinder A98-045
Aerodynamic Performance of Supersonic Missile Body- and Wing Tip-Mounted Lateral Jets A98-046
Fin Damage and Mass Offset for Kinetic Energy Projectile Spin/Pitch Lock-In A98-047
Hinge Moment Coefficient Prediction for Nose-Mounted Canard Controls at Supersonic Speeds A98-049
Navier–Stokes Predictions of the Individual Components of the Pitch-Damping Sum A98-094
Physics of Resonance in a Supersonic Forward-Facing Cavity A98-098
Evaluating Aerodynamic Characteristics of Wind-Tunnel Models Produced by Rapid Prototyping Methods A98-118

Configuration Design

Aerodynamic Performance of Supersonic Missile Body- and Wing Tip-Mounted Lateral Jets A98-046
Viscous/Inviscid Interactions of the Forebody Flowfield of an Airbreathing Hypersonic Vehicle A98-072
Launch Vehicle Concept with Tandem Staging and Air Collection A98-103
Optimization of a Space Transportation System Including Design Sensitivities A98-123
Space Shuttle Family: Shuttle II, Mini Shuttle, and Micro Shuttles A98-133

Launch Vehicle and Sounding Rocket Systems

Space Shuttle Family: Shuttle II, Mini Shuttle, and Micro Shuttles A98-133

Missile Systems

Hinge Moment Coefficient Prediction for Nose-Mounted Canard Controls at Supersonic Speeds A98-049
Analysis of a Canister Projectile System A98-112

Propulsion and Propellant Systems

Launch Vehicle Concept with Tandem Staging and Air Collection A98-103

Simulation

Fin Damage and Mass Offset for Kinetic Energy Projectile Spin/Pitch Lock-In A98-047
Numerical Approach for Computing Noise-Induced Vibration from Launch Environments A98-056

Structural Design (Including Loads)

Risk Assessment Consequences of the Lognormal Distribution of Midtropospheric Wind Changes A98-018
Numerical Approach for Computing Noise-Induced Vibration from Launch Environments A98-056

Testing, Flight and Ground

Technique to Reduce Yaw and Jump of Fin-Stabilized Projectiles A98-017
Lateral Jet Control of a Supersonic Missile: Computational and Experimental Comparisons A98-024
Space Shuttle Main Engine Health Monitoring with Exhaust Plume Emission Spectroscopy A98-061
Viscous/Inviscid Interactions of the Forebody Flowfield of an Airbreathing Hypersonic Vehicle A98-072
Evaluating Aerodynamic Characteristics of Wind-Tunnel Models Produced by Rapid Prototyping Methods A98-118

Thermal Protection Systems

Analytic Corrections to Computational Heating Predictions Accounting for Changes in Surface Catalysis A98-069
Aerothermodynamics of a Parashield Re-Entry Vehicle A98-071
Unsteady Effects of Dissociative Cooling Under High-Stagnation-Point Heat Loads A98-099

Trajectories and Tracking Systems

Technique to Reduce Yaw and Jump of Fin-Stabilized Projectiles A98-017

Vibration

Numerical Approach for Computing Noise-Induced Vibration from Launch Environments A98-056
Whole-Spacecraft Passive Launch Isolation A98-107

Propulsion

Airbreathing Propulsion

Forebody Precompression Effects and Inlet Entry Conditions for Hypersonic Vehicles A98-004

Electric and Advanced Space Propulsion

Mercury Mission Design Using Solar Electric Propulsion Spacecraft A98-067

Engine Performance

Optimal Performance of a Dual-Fuel Single-Stage Rocket A98-104

Environmental Effects

Spacecraft Plasma Environment and Contamination Simulation Code: Description and First Tests A98-033

Liquid Rocket Motors and Missile Systems

Space Shuttle Main Engine Health Monitoring with Exhaust Plume Emission Spectroscopy A98-061
Optimal Performance of a Dual-Fuel Single-Stage Rocket A98-104

Solid Rocket Motors and Missile Systems

Analysis of a Canister Projectile System A98-112

Space Technology

Aerobraking Configurations/ Aerothermodynamics

Aerothermodynamics of a Parashield Re-Entry Vehicle A98-071
Analysis and Design of the Aerocapture Tether with Accounting for Stochastic Errors A98-106
Hypersonic Blunt-Body Flows in Hydrogen–Neon Mixtures A98-114

Aerobraking Flight Mechanics

Optimality of the Heating-Rate-Constrained Aerocruise Maneuver A98-057

Humans in Space/Life Support Systems, EVA

Computational Dynamic Analysis of Extravehicular Activity: Large-Mass Handling A98-035
Critical Need for a Swingby Return Option for Early Manned Mars Missions A98-134

Landers

Estimation of Entry Parameters from Heat Flux Measurements A98-090

Mission Design and Aircraft Handling Qualities

Trajectory Design in the Sun–Earth–Moon System Using Lunar Gravity Assists A98-031
Design Considerations for Venus Microprobes A98-036
Greatest Critical Difference Statistics in *k*-out-of-*n* Reliability Structures A98-038
Mars Free Return Trajectories A98-055
Mercury Mission Design Using Solar Electric Propulsion Spacecraft A98-067
Precision Spacecraft Attitude Estimators Using an Optical Payload Pointing System A98-077
Analysis and Design of the Aerocapture Tether with Accounting for Stochastic Errors A98-106
Impact of a Distributed Architecture for Space-Based Radar A98-109
Critical Need for a Swingby Return Option for Early Manned Mars Missions A98-134

Mission Trajectories (Earth and Interplanetary)

Spin Rate of Galileo Probe During Descent into the Atmosphere of Jupiter A98-013
Trajectory Design in the Sun–Earth–Moon System Using Lunar Gravity Assists A98-031
Analysis of the TOPEX/Poseidon Operational Orbit: Observed Variations and Why A98-034
Precision Orbit Determination for the Geostat Follow-On Satellites A98-053
Mars Free Return Trajectories A98-055
Optimality of the Heating-Rate-Constrained Aerocruise Maneuver A98-057
Mercury Mission Design Using Solar Electric Propulsion Spacecraft A98-067
Direct Approach for Computing Near-Optimal Low-Thrust Earth-Orbit Transfers A98-081

Space Experiments

Instrument for Measuring Spacecraft Potential A98-009
Midcourse Space Experiment Contamination Measurement During Cryogen Phase A98-028
Local Environment Surrounding the Midcourse Space Experiment Satellite During Its First Week A98-030
Particle-in-Cell Code Analysis of Charging Hazards and Wake Studies Experiment A98-062
Development of a Renewable Atomic Oxygen Sensor for Low Earth Orbit A98-068
Midcourse Space Experiment Satellite Flight Measurements of Contaminants on Quartz Crystal Microbalances A98-084
Unity Check Method for Structural Damage Detection A98-091
Results from the Space Technology Research Vehicle 1a Atomic Oxygen Experiment A98-101
Spacecraft Potential Control by the Plasma Source Instrument on the POLAR Satellite A98-131

Space Systems

Effects of Rocket Engine on Single-Stage-to-Orbit Vehicle A98-019
Particle-in-Cell Code Analysis of Charging Hazards and Wake Studies Experiment A98-062
Semiempirical Method for Predicting Single Event Effect Rates Due to Direct Ionization A98-088
Impact of a Distributed Architecture for Space-Based Radar A98-109

Spacecraft Attitude Determination

Orbital and Configuration Influences on Spacecraft Dynamic Response A98-029
Truss Structure Effects on International Space Station Global Positioning System Antenna Performance A98-066
Precision Spacecraft Attitude Estimators Using an Optical Payload Pointing System A98-077
Real-Time Optimal Attitude Estimation Using Horizon Sensor and Magnetometer Data A98-122
Multipath Effects on International Space Station Global Positioning System Performance A98-136

Spacecraft Communication

Truss Structure Effects on International Space Station Global Positioning System Antenna Performance A98-066
Multipath Effects on International Space Station Global Positioning System Performance A98-136

Spacecraft Contamination/Sterilization

Revised Estimates of Photochemically Deposited Contamination on the Global Positioning System Satellites A98-020
Midcourse Space Experiment Contamination Measurement During Cryogen Phase A98-028
Local Environment Surrounding the Midcourse Space Experiment Satellite During Its First Week A98-030
Spacecraft Plasma Environment and Contamination Simulation Code: Description and First Tests A98-033
Midcourse Space Experiment Satellite Flight Measurements of Contaminants on Quartz Crystal Microbalances A98-084
Mass Spectrometric Analysis of Reaction Products of Fast Oxygen Atoms-Material Interactions A98-125
Arcing on Aluminum Anodized Plates Immersed in Low-Density Plasmas A98-126

Spacecraft Data Sensing, Processing, and Transmission

Performance Analysis for International Space Station Wireless Local Area Network A98-135

Spacecraft Power

Sheath Structure Around a High-Voltage Body in Magnetized Nonflowing Ionospheric Plasma A98-011
Ionization Around a High-Voltage Body in Magnetized Nonflowing Ionospheric Plasma A98-012
Particle-in-Cell Code Analysis of Charging Hazards and Wake Studies Experiment A98-062
Solar Array Degradation by Dust Impacts During Cometary Encounters A98-092

Spacecraft Radiation Protection

Low-Earth-Orbit Atomic Oxygen Erosion of Polymer Surfaces A98-008
Semiempirical Method for Predicting Single Event Effect Rates Due to Direct Ionization A98-088
Critical Need for a Swingby Return Option for Early Manned Mars Missions A98-134

Spacecraft Sensor Systems

Midcourse Space Experiment Contamination Measurement During Cryogen Phase A98-028
Development of a Renewable Atomic Oxygen Sensor for Low Earth Orbit A98-068
Precision Spacecraft Attitude Estimators Using an Optical Payload Pointing System A98-077
Calibration of Accelerometers for the Measurement of Microvibrations A98-108
Impact of a Distributed Architecture for Space-Based Radar A98-109
Approach to Space Shuttle Main Engine Health Monitoring Using Plume Spectra A98-129

Spacecraft Structural Configuration, Design, and Analysis

Stiffness Design of Deployable Satellite Antennas in Deployed Configuration A98-060
Truss Structure Effects on International Space Station Global Positioning System Antenna Performance A98-066
Waverider Aerodynamics and Preliminary Design for Two-Stage-to-Orbit Missions, Part 2 A98-074
Motion Control of Adaptive Space Structures Based on Artificial Potential Method A98-079
Whole-Spacecraft Passive Launch Isolation A98-107

Spacecraft Test and Evaluation

Instrument for Measuring Spacecraft Potential A98-009
Autonomous Modal Identification of the Space Shuttle Tail Rudder A98-027
Calibration of Accelerometers for the Measurement of Microvibrations A98-108

Spacecraft Thermal Management

Calculation of Sensitivities in Thermal Control Systems with Nonlinear Inequality Constraints A98-087
Efficient Solution of Spacecraft Thermal Models Using Preconditioned Conjugate Gradient Methods A98-119

Structural Mechanics and Materials

Aeroelasticity and Control

Launch Vehicle Self-Sustained Oscillation from Aeroelastic Coupling Part 1: Theory A98-058
Launch Vehicle Self-Sustained Oscillation from Aeroelastic Coupling Part 2: Analysis A98-059

Flexible and Active Structures

Motion Control of Adaptive Space Structures Based on Artificial Potential Method A98-079
Calibration of Accelerometers for the Measurement of Microvibrations A98-108

Materials Structural Properties

Mass Spectrometric Analysis of Reaction Products of Fast Oxygen Atoms-Material Interactions A98-125

Structural Design

Integrated Solution for Computational Static Aeroelasticity of Rockets A98-096
Simplified Postbuckling Analysis for Axially Compressed Shells A98-113

Structural Durability (Including Fatigue, Fracture, and Environmental Degradation)

Stiffness Design of Deployable Satellite Antennas in Deployed Configuration A98-060
Dynamic Oxidation Performance of NARloy-Z with Cu-30 Volume Percent Cr Coating A98-086
Solar Array Degradation by Dust Impacts During Cometary Encounters A98-092
Mass Spectrometric Analysis of Reaction Products of Fast Oxygen Atoms-Material Interactions A98-125

Structural Dynamics and Characterization

Autonomous Modal Identification of the Space Shuttle Tail Rudder A98-027
Unity Check Method for Structural Damage Detection A98-091
Whole-Spacecraft Passive Launch Isolation A98-107

Structural Finite Elements

Control of Thermal Deformations of Spherical Mirror Segment A98-026
Simplified Postbuckling Analysis for Axially Compressed Shells A98-113

Structural Modeling

Unity Check Method for Structural Damage Detection A98-091

Structural Optimization

Control of Thermal Deformations of Spherical Mirror Segment A98-026
Integrated Solution for Computational Static Aeroelasticity of Rockets A98-096

Structural Stability

Buckling and Quasistatic Thermal–Structural Response of an Asymmetric Rolled-Up Solar Array A98-025
Simplified Postbuckling Analysis for Axially Compressed Shells A98-113

Thermal Effects

Buckling and Quasistatic Thermal–Structural Response of an Asymmetric Rolled-Up Solar Array A98-025
Orbital and Configuration Influences on Spacecraft Dynamic Response A98-029

Thermophysics and Heat Transfer

Ablation, Pyrolysis, Thermal Decomposition, and Degradation

Chemical Nonequilibrium Stagnation Ablation Analysis of MUSES-C Superorbital Re-Entry Capsule A98-065
Unsteady Effects of Dissociative Cooling Under High-Stagnation-Point Heat Loads A98-099

Aerothermodynamics/Thermal Protection

Heat Flux on Partially Catalytic Surfaces in Hypersonic Flows A98-001
Shuttle Orbiter Experimental Boundary-Layer Transition Results with Isolated Roughness A98-041
Trajectory-Based Thermal Protection System Sizing for an X-33 Winged Vehicle Concept A98-042
Improved Fay–Riddell Procedure to Compute the Stagnation Point Heat Flux A98-063
Chemical Nonequilibrium Stagnation Ablation Analysis of MUSES-C Superorbital Re-Entry Capsule A98-065
Analytic Corrections to Computational Heating Predictions Accounting for Changes in Surface Catalysis A98-069
Aerothermodynamics of a Parashield Re-Entry Vehicle A98-071
Estimation of Entry Parameters from Heat Flux Measurements A98-090
Unsteady Effects of Dissociative Cooling Under High-Stagnation-Point Heat Loads A98-099
Minimum Heating Entry Trajectories for Reusable Launch Vehicles A98-105

Computational Heat Transfer

Trajectory-Based Thermal Protection System Sizing for an X-33 Winged Vehicle Concept A98-042
Waverider Aerodynamics and Preliminary Design for Two-Stage-to-Orbit Missions, Part 1 A98-073
Calculation of Sensitivities in Thermal Control Systems with Nonlinear Inequality Constraints A98-087

Cryogenics

Midcourse Space Experiment Satellite Flight Measurements of Contaminants on Quartz Crystal Microbalances A98-084

Nonintrusive Diagnostics

Space Shuttle Main Engine Health Monitoring with Exhaust Plume Emission Spectroscopy A98-061

Radiation in Participating Media

Detailed Computation of Ultraviolet Spectra in Rarefied Hypersonic Flow A98-102

Radiation Interchange Between Surfaces

Thermal Characterization of Honeycomb Core Sandwich Structures A98-085
Analysis of a Canister Projectile System A98-112

Thermal Control

Design Considerations for Venus Microprobes A98-036

Thermochemistry and Chemical Kinetics

Low-Earth-Orbit Atomic Oxygen Erosion of Polymer Surfaces A98-008
Detailed Computation of Ultraviolet Spectra in Rarefied Hypersonic Flow A98-102

Thermophysical Properties

Thermal Characterization of Honeycomb Core Sandwich Structures A98-085

Chronological Index

A97-051 Six-Degree-of-Freedom Entry Dispersion Analysis for the METEOR Recovery Module. Prasun N. Desai, Robert D. Braun, Richard W. Powell, Walter C. Engelund, and Paul V. Tartabini, *NASA Langley Research Center* (**34**, 3, p. 334) Article based on AIAA Paper 96-0903

Technical Comment by Todd McCusker, *GB Tech/Space Industries* (**35**, 1, p. 117)

Reply (**35**, 1, p. 117)

A98-001 Heat Flux on Partially Catalytic Surfaces in Hypersonic Flows. M. Serpico, *Centro Italiano Ricerche Aerospaziali, Italy*; and R. Monti and R. Savino, *University of Naples "Federico II," Italy* (**35**, 1, p. 9) Article

A98-002 High-Altitude Capsule Aerodynamics with Real Gas Effects. M. S. Ivanov, G. N. Markelov, and S. F. Gimelshein, *Institute of Theoretical and Applied Mechanics, Russia*; and L. V. Mishina, A. N. Krylov, and N. V. Grechko, *RSC ENERGIA, Russia* (**35**, 1, p. 16) Article based on AIAA Paper 97-0476

A98-003 Pressure Measurements on a Mach 5 Sabot During Discard. Jason N. Dick and David S. Dolling, *University of Texas at Austin* (**35**, 1, p. 23) Article based on AIAA Paper 96-2042

A98-004 Forebody Precompression Effects and Inlet Entry Conditions for Hypersonic Vehicles. Thomas M. Berens and Nobert C. Bissinger, *Daimler–Benz AG, Germany* (**35**, 1, p. 30) Article based on AIAA Paper 96-4531

A98-005 Influence of Crossflow and Turbulence on Vortex Flow Around a Supersonic Missile. F. Grasso, *University of Rome "La Sapienza," Italy*; and G. Iaccarino, *Centro Italiano Ricerche Aerospaziali, Italy* (**35**, 1, p. 37) Article

A98-006 Orbit Plane Control Strategies for Inclined Geosynchronous Satellite Constellation. Jean Albert Kechichian, *The Aerospace Corporation* (**35**, 1, p. 46) Article

A98-007 Construction Criteria for a Large Space Structure in Low Earth Orbit. Masamichi Shigehara, Yatsuko Iwasaki, and Yoko Shigedomi, *Tokyo Metropolitan Institute of Technology, Japan*; and Shuichiro Fukuzawa, *Hokkaido Electric Power Co., Inc., Japan* (**35**, 1, p. 55) Article

A98-008 Low-Earth-Orbit Atomic Oxygen Erosion of Polymer Surfaces. James K. Baird, *University of Alabama in Huntsville* (**35**, 1, p. 62) Article

A98-009 Instrument for Measuring Spacecraft Potential. Luke Goembel, *Goembel Lab and Consulting, Inc.*; and John P. Doering, *Johns Hopkins University* (**35**, 1, p. 66) Article

A98-010 Metric for Systems Evaluation and Design of Satellite-Based Internet Links. Andjelka Kelic, Graeme B. Shaw, and Daniel E. Hastings, *Massachusetts Institute of Technology* (**35**, 1, p. 73) Article

A98-011 Sheath Structure Around a High-Voltage Body in Magnetized Nonflowing Ionospheric Plasma. Mengu Cho, *Kyushu Institute of Technology, Japan* (**35**, 1, p. 82) Article

A98-012 Ionization Around a High-Voltage Body in Magnetized Nonflowing Ionospheric Plasma. Mengu Cho, *Kyushu Institute of Technology, Japan* (**35**, 1, p. 90) Article

A98-013 Spin Rate of Galileo Probe During Descent into the Atmosphere of Jupiter. L. J. Lanzerotti, *Bell Laboratories, Lucent Technologies*; K. Rinnert, *Max-Planck-Institut für Aeronomie, Germany*; D. Carlock, *Hughes Space and Communications Company*; C. K. Sobeck, *NASA Ames Research Center*; and G. Dehmel, *Universität Braunschweig, Germany* (**35**, 1, p. 100) Engineering Note

A98-014 Flowfield over Bulbous Heat Shield in Transonic and Low Supersonic Speeds. R. C. Mehta, *Vikram Sarabhai Space Center, India* (**35**, 1, p. 102) Engineering Note based on AIAA Paper 97-2256 CP978

A98-015 Euler Solution of Axisymmetric Jets in Supersonic External Flow. Erdal Yılmaz and Mehmet Şerif Kavsaoğlu, *Middle East Technical University, Turkey* (**35**, 1, p. 105) Engineering Note

A98-016 Evaluation of Engineering Heat Transfer Prediction Methods in High-Enthalpy Flow Conditions. G. Simeonides, L. Walpot, M. Netterfield, and G. Tumino, *European Space Agency, The Netherlands* (**35**, 1, p. 107) Engineering Note based on AIAA Paper 96-1860

A98-017 Technique to Reduce Yaw and Jump of Fin-Stabilized Projectiles. Edward M. Schmidt and William F. Donovan, *U.S. Army Research Laboratory* (**35**, 1, p. 110) Engineering Note based on AIAA Paper 97-0424

A98-018 Risk Assessment Consequences of the Lognormal Distribution of Midtropospheric Wind Changes. Francis J. Merceret, *NASA Kennedy Space Center* (**35**, 1, p. 111) Engineering Note

A98-019 Effects of Rocket Engine on Single-Stage-to-Orbit Vehicle. W. D. Huang, K. C. Wang, and Q. Z. Chen, *National University of Defense Technology, PRC* (**35**, 1, p. 113) Engineering Note

A98-020 Revised Estimates of Photochemically Deposited Contamination on the Global Positioning System Satellites. A. C. Tribble, *Rockwell International Corporation* (**35**, 1, p. 114) Engineering Note

A98-021 Exploring the Validity of the Spalart–Allmaras Turbulence Model for Hypersonic Flows. R. Paciorri, W. Dieudonné, G. Degrez, J.-M. Charbonnier, and H. Deconinck, *von Kármán Institute for Fluid Dynamics, Belgium* (**35**, 2, p. 121) Article based on AIAA Paper 97-2023

A98-022 Navier–Stokes Analysis of Subsonic Flowfields over a Missile Configuration. Ismail H. Tuncer and Max F. Platzer, *U.S. Naval Postgraduate School*; and Robert D. VanDyken, *U.S. Naval Air Warfare Center* (**35**, 2, p. 127) Article based on AIAA Paper 97-0635

A98-023 Improved Methodology for Axial Force Prediction at Angle of Attack. F. G. Moore and T. C. Hymer, *U.S. Naval Surface Warfare Center* (**35**, 2, p. 132) Article

A98-024 Lateral Jet Control of a Supersonic Missile: Computational and Experimental Comparisons. B. Srivastava, *Raytheon Company* (**35**, 2, p. 140) Article based on AIAA Paper 97-0639

A98-025 Buckling and Quasistatic Thermal–Structural Response of an Asymmetric Rolled-Up Solar Array. Masahiko Murozono, *Kyushu University, Japan*; and Earl A. Thornton, *University of Virginia* (**35**, 2, p. 147) Article

A98-026 Control of Thermal Deformations of Spherical Mirror Segment. Rakesh K. Kapania, P. Mohan, and A. Jakubowski, *Virginia Polytechnic Institute and State University* (**35**, 2, p. 156) Article based on AIAA Paper 96-4154 CP9611

A98-027 Autonomous Modal Identification of the Space Shuttle Tail Rudder. Richard S. Pappa, *NASA Langley Research Center*; George H. James III and David C. Zimmerman, *University of Houston* (**35**, 2, p. 163) Article

A98-028 Midcourse Space Experiment Contamination Measurement During Cryogen Phase. O. M. Uy, R. C. Benson, R. E. Erlandson, M. T. Boies, D. M. Silver, and J. C. Lesho, *Johns Hopkins University, Applied Physics Laboratory*; B. D. Green and G. E. Galica, *Physical Sciences, Inc.*; B. E. Wood, *Sverdrup Technology, Inc.*; and D. F. Hall, *The Aerospace Corporation* (**35**, 2, p. 170) Article

A98-029 Orbital and Configuration Influences on Spacecraft Dynamic Response. Stanley E. Woodard, *NASA Langley Research Center* (**35**, 2, p. 177) Article

A98-030 Local Environment Surrounding the Midcourse Space Experiment Satellite During Its First Week. B. D. Green, G. E. Galica, and P. A. Mulhall, *Physical Sciences, Inc.*; O. M. Uy, J. C. Lesho, M. T. Boies, R. C. Benson, T. E. Phillips, D. M. Silver, and R. E. Erlandson, *Johns Hopkins University, Applied Physics Laboratory*; B. E. Wood, *Sverdrup Technology, Inc.*; D. F. Hall, *The Aerospace Corporation*; and J. D. Mill, *Environmental Research Institute of Michigan* (**35**, 2, p. 183) Article

A98-031 Trajectory Design in the Sun–Earth–Moon System Using Lunar Gravity Assists. Roby S. Wilson and Kathleen C. Howell, *Purdue University* (**35**, 2, p. 191) Article

A98-032 Auto-Attitude Stabilization of a Twin-Satellite System Through Very Short Tethers. Krishna Kumar and K. D. Kumar, *Indian Institute of Technology* (**35**, 2, p. 199) Article

A98-033 Spacecraft Plasma Environment and Contamination Simulation Code: Description and First Tests. Jean-François Roussel, *ONERA, France* (**35**, 2, p. 205) Article

A98-034 Analysis of the TOPEX/Poseidon Operational Orbit: Observed Variations and Why. Raymond B. Frauenholz, Ramachandra S. Bhat, and Bruce E. Shapiro, *Jet Propulsion Laboratory, California Institute of Technology*; and Robert K. Leavitt, *Sterling Software, Inc.* (**35**, 2, p. 212) Article

A98-035 Computational Dynamic Analysis of Extravehicular Activity: Large-Mass Handling. Dava J. Newman and Grant Schaffner, *Massachusetts Institute of Technology* (**35**, 2, p. 225) Engineering Note

A98-036 Design Considerations for Venus Microprobes. Ralph D. Lorenz, *University of Arizona* (**35**, 2, p. 228) Engineering Note

A98-037 Numerical Predictions of Hypersonic Flow over a Two-Dimensional Compression Ramp. S. R. Amaratunga, O. R. Tutty, and G. T. Roberts, *University of Southampton, England, UK* (**35**, 2, p. 230) Engineering Note based on AIAA Paper 96-4587

A98-038 Greatest Critical Difference Statistics in *k*-out-of-*n* Reliability Structures. Hüseyin Sarper and Roger W. Johnson, *University of Southern Colorado*; and Phermsak Siriphala, *Wichita State University* (**35**, 2, p. 232) Engineering Note

A98-039 Efficient Jitter Analysis for Spacecraft. Peiman G. Maghami, *NASA Langley Research Center* (**35**, 2, p. 235) Engineering Note

A98-040 Iterative Learning-Based Extraction of Aerobomb Drag. Yangquan Chen and Jian-Xin Xu, *National University of Singapore, Singapore*; and Changyun Wen, *Nanyang Technological University, Singapore* (**35**, 2, p. 237) Engineering Note

A98-041 Shuttle Orbiter Experimental Boundary-Layer Transition Results with Isolated Roughness. Scott A. Berry, *NASA Langley Research Center*; Stanley A. Bouslog, *B. F. Goodrich Aerospace*; Gregory J. Brauckmann, *NASA Langley Research Center*; and Jose M. Caram, *NASA Johnson Space Flight Center* (**35**, 3, p. 241) Article

A98-042 Trajectory-Based Thermal Protection System Sizing for an X-33 Winged Vehicle Concept. David Olynick, *NASA Ames Research Center* (**35**, 3, p. 249) Article

A98-043 Hybrid Euler/Particle Approach for Continuum/Rarefied Flows. Roberto Roveda, David B. Goldstein, and Philip L. Varghese, *University of Texas at Austin* (**35**, 3, p. 258) Article

A98-044 Improved Satellite Drag Coefficient Calculations from Orbital Measurements of Energy Accommodation. Kenneth Moe, *U.S. Air Force Space and Missile Systems Center*; Mildred M. Moe, *University of California, Irvine*; and Steven D. Wallace, *University of California, San Diego* (**35**, 3, p. 266) Article

A98-045 Potential Flow Solutions with Wakes over an Ogive Cylinder. Ismail H. Tuncer and Max F. Platzer, *U.S. Naval Postgraduate School* (**35**, 3, p. 273) Article

A98-046 Aerodynamic Performance of Supersonic Missile Body- and Wing Tip-Mounted Lateral Jets. B. Srivastava, *Raytheon Electronics Systems* (**35**, 3, p. 278) Article based on AIAA Paper 97-2247 CP978

A98-047 Fin Damage and Mass Offset for Kinetic Energy Projectile Spin/Pitch Lock-In. Ameer G. Mikhail, *U.S. Army Research Laboratory* (**35**, 3, p. 287) Article based on AIAA Paper 96-3448 CP967

A98-048 Experimental Investigation of Super- and Hypersonic Jet Interaction on Missile Configurations. Julius Brandeis and Jacob Gill, *RAFAEL, Ministry of Defence, Israel* (**35**, 3, p. 296) Article based on AIAA Paper 97-3723 CP9711

A98-049 Hinge Moment Coefficient Prediction for Nose-Mounted Canard Controls at Supersonic Speeds. Michael G. Landers, *Dynetics, Inc.*; and D. Brian Landrum, *University of Alabama in Huntsville* (**35**, 3, p. 303) Article

A98-050 Optimal External Configuration Design of Unguided Missiles. Ömer Tanrıkulu and Veysi Ercan, *Defense Industries Research and Development Institute, Turkey* (**35**, 3, p. 312) Article based on AIAA Paper 97-3725 CP9710

A98-051 Trajectory Optimization Using Eccentric Longitude Formulation. Jean Albert Kechichian, *The Aerospace Corporation* (**35**, 3, p. 317) Article

A98-052 Low-Thrust Eccentricity-Constrained Orbit Raising. Jean Albert Kechichian, *The Aerospace Corporation* (**35**, 3, p. 327) Article

A98-053 Precision Orbit Determination for the Geostat Follow-On Satellites. Kelly Irish, Kenn Gold, George Born, Angela Reichert, and Penina Axelrad, *University of Colorado* (**35**, 3, p. 336) Article

A98-054 Entry Guidance for the X-33 Vehicle. Ping Lu, *Iowa State University*; and John M. Hanson, *NASA Marshall Space Flight Center* (**35**, 3, p. 342) Article

A98-055 Mars Free Return Trajectories. Moonish R. Patel, *Lockheed Martin Missiles and Space Company*; James M. Longuski, *Purdue University*; and Jon A. Sims, *Jet Propulsion Laboratory, California Institute of Technology* (**35**, 3, p. 350) Article

A98-056 Numerical Approach for Computing Noise-Induced Vibration from Launch Environments. Nickolas Vlahopoulos, *University of Michigan*; Charles Vallance, *GenCorp Aerojet*; and Richard D. Stark III, *Automated Analysis Corporation* (**35**, 3, p. 355) Article

A98-057 Optimality of the Heating-Rate-Constrained Aerocruise Maneuver. I. Michael Ross and John C. Nicholson, *U.S. Naval Postgraduate School* (**35**, 3, p. 361) Article

A98-058 Launch Vehicle Self-Sustained Oscillation from Aeroelastic Coupling Part 1: Theory. K. W. Dotson, R. L. Baker, and B. H. Sako, *The Aerospace Corporation* (**35**, 3, p. 365) Article

A98-059 Launch Vehicle Self-Sustained Oscillation from Aeroelastic Coupling Part 2: Analysis. K. W. Dotson, R. L. Baker, and R. J. Bywater, *The Aerospace Corporation* (**35**, 3, p. 374) Article

A98-060 Stiffness Design of Deployable Satellite Antennas in Deployed Configuration. Masayoshi Misawa, *Nippon Telegraph and Telephone Corporation, Japan*; and Yoshiaki Ohkami, *Tokyo Institute of Technology, Japan* (**35**, 3, p. 380) Article

A98-061 Space Shuttle Main Engine Health Monitoring with Exhaust Plume Emission Spectroscopy. Gopal D. Tejwani, Felix E. Bircher, David B. Van Dyke, and Charles C. Thurman, *NASA Stennis Space Center* (**35**, 3, p. 387) Article based on AIAA Paper 97-2666

A98-062 Particle-in-Cell Code Analysis of Charging Hazards and Wake Studies Experiment. Gregory B. Giffin, Daniel E. Hastings, Gabriel I. Font, and Graeme B. Shaw, *Massachusetts Institute of Technology*; and David L. Cooke, *U.S. Air Force Phillips Laboratory* (**35**, 3, p. 395) Article

A98-063 Improved Fay–Riddell Procedure to Compute the Stagnation Point Heat Flux. Gennaro Zuppardi and Gianpaolo Verde, *University of Naples "Federico II," Italy* (**35**, 3, p. 403) Engineering Note

A98-064 Flow Visualization on Lower Surfaces of Wave Rider Conf:gurations at Mach 5.5. T. Ohta and R. Matsuzaki, *Tokyo Metropolitan Institute of Technology, Japan* (**35**, 3, p. 405) Engineering Note based on AIAA Paper 97-1884

A98-065 Chemical Nonequilibrium Stagnation Ablation Analysis of MUSES-C Superorbital Re-Entry Capsule. Kojiro Suzuki and Hirotoshi Kubota, *University of Tokyo, Japan*; and Kazuhisa Fujita and Takashi Abe, *Institute of Space and Astronautical Science, Japan* (**35**, 3, p. 407) Engineering Note based on AIAA Paper 97-2481

A98-066 Truss Structure Effects on International Space Station Global Positioning System Antenna Performance. Shian U. Hwu, *Lockheed Martin Space Mission Systems and Services*; and Robert J. Panneton, *NASA Johnson Space Center* (**35**, 3, p. 409) Engineering Note

A98-067 Mercury Mission Design Using Solar Electric Propulsion Spacecraft. Craig A. Kluever and Mudar Abu-Saymeh, *University of Missouri–Columbia/Kansas City* (**35**, 3, p. 411) Engineering Note

A98-068 Development of a Renewable Atomic Oxygen Sensor for Low Earth Orbit. S. B. Gabriel, J. J. Osborne, G. T. Roberts, and A. R. Chambers, *University of Southampton, England, UK* (**35**, 3, p. 413) Engineering Note

A98-069 Analytic Corrections to Computational Heating Predictions Accounting for Changes in Surface Catalysis. Peter A. Gnoffo, *NASA Langley Research Center*; and George R. Inger, *Iowa State University* (**35**, 4, p. 417) Article

A98-070 Comparative Similarity Analysis of Hypersonic Rarefied Gas Flows Near Simple-Shape Bodies. Vladimir V. Riabov, *Daniel Webster College* (**35**, 4, p. 424) Article based on AIAA Paper 97-2226 CP978

A98-071 Aerothermodynamics of a Parashield Re-Entry Vehicle. Harry K. Magazu, Mark J. Lewis, and David L. Akin, *University of Maryland* (**35**, 4, p. 434) Article

A98-072 Viscous/Inviscid Interactions of the Forebody Flowfield of an Airbreathing Hypersonic Vehicle. John J. Bertin, Matthew C. Towne, Mark A. Malan, Alois F. Kreins, Matthew E. Zuber, and Michael B. Parks, *U.S. Air Force Academy* (**35**, 4, p. 442) Article based on AIAA Paper 97-0766

A98-073 Waverider Aerodynamics and Preliminary Design for Two-Stage-to-Orbit Missions, Part 1. D. Strohmeyer and T. Eggers, *DLR, German Aerospace Center*; and M. Haupt, *Technical University of Brunswick, Germany* (**35**, 4, p. 450) Article based on AIAA Paper 96-4544

A98-074 Waverider Aerodynamics and Preliminary Design for Two-Stage-to-Orbit Missions, Part 2. W. Heinze and A. Bardenhagen, *Technical University of Brunswick, Germany* (**35**, 4, p. 459) Article based on AIAA Paper 96-4544 & 96-3546

A98-075 Magnus Effects on Stability of Wraparound-Finned Missiles. Ömer Tanrıkulu and Gökmen Mahmutyazıcıoğlu, *Defense Industries Research and Development Institute (TÜBİTAK–SAGE), Turkey* (**35**, 4, p. 467) Article

A98-076 New Three-Dimensional Inverse Method for High-Speed Vehicle Design. Jae Woo Lee, *Kon-Kuk University, Korea*; and W. H. Mason, *Virginia Polytechnic Institute and State University* (**35**, 4, p. 473) Article

A98-077 Precision Spacecraft Attitude Estimators Using an Optical Payload Pointing System. Jonathan A. Tekawy, *The Boeing Company* (**35**, 4, p. 480) Article

A98-078 Launch Detection Satellite System Engineering Error Analysis. M. R. Beaulieu and K. T. Alfriend, *U.S. Naval Postgraduate School*; and T. Jerardi, *Johns Hopkins University, Applied Physics Laboratory* (**35**, 4, p. 487) Article

A98-079 Motion Control of Adaptive Space Structures Based on Artificial Potential Method. Yuji Matsuzaki, Akira Ichiyanagi, and Tomihiko Yoshida, *Nagoya University, Japan* (**35**, 4, p. 496) Article based on AIAA Paper 97-1259 CP973

A98-080 Application of Numerical Multizone Approach to the Study of Satellite Thruster Plumes. D. Giordano, *European Space Agency, The Netherlands*; M. Ivanov, A. Kashkovsky, and G. Markelov, *Institute of Theoretical and Applied Mechanics, Russia*; G. Tumino, *European Space Agency, The Netherlands*; and G. Koppenwallner, *Hyperschall Technologie Göttingen, Germany* (**35**, 4, p. 502) Article based on AIAA Paper 97-2538

A98-081 Direct Approach for Computing Near-Optimal Low-Thrust Earth-Orbit Transfers. Craig A. Kluever, *University of Missouri–Columbia*; and Steven R. Oleson, *NYMA, Inc.* (**35**, 4, p. 509) Article

A98-082 Orbit Raising with Low-Thrust Tangential Acceleration in Presence of Earth Shadow. Jean Albert Kechichian, *The Aerospace Corporation* (**35**, 4, p. 516) Article

A98-083 Low-Thrust Inclination Control in Presence of Earth Shadow. Jean Albert Kechichian, *The Aerospace Corporation* (**35**, 4, p. 526) Article

A98-084 Midcourse Space Experiment Satellite Flight Measurements of Contaminants on Quartz Crystal Microbalances. B. E. Wood, *Sverdrup Technology, Inc.*; D. F. Hall, *The Aerospace Corporation*; J. C. Lesho and O. M. Uy, *Johns Hopkins University, Applied Physics Laboratory*; J. S. Dyer, *Utah State University*; and W. T. Bertrand, *Sverdrup Technology, Inc.* (**35**, 4, p. 533) Article based on AIAA Paper 97-0841

A98-085 Thermal Characterization of Honeycomb Core Sandwich Structures. David C. Copenhaver, Elaine P. Scott, and Alexander Hanuska, *Virginia Polytechnic Institute and State University* (**35**, 4, p. 539) Article based on AIAA Paper 97-2455

A98-086 Dynamic Oxidation Performance of NARloy-Z with Cu-30 Volume Percent Cr Coating. T. A. Wallace and R. K. Clark, *NASA Langley Research Center*; and K. T. Chiang, *The Boeing Company* (**35**, 4, p. 546) Article

A98-087 Calculation of Sensitivities in Thermal Control Systems with Nonlinear Inequality Constraints. S. Suresha, *Indian Space Research Organisation*; and S. C. Gupta, *Indian Institute of Science* (**35**, 4, p. 552) Article

A98-088 Semiempirical Method for Predicting Single Event Effect Rates Due to Direct Ionization. Michele M. Gates, *NASA Goddard Space Flight Center*; and Mark J. Lewis, *University of Maryland* (**35**, 4, p. 559) Article

A98-089 Three-Dimensional Modeling, Estimation, and Fault Diagnosis of Spacecraft Air Contaminants. Anand P. Narayan and W. Fred Ramirez, *University of Colorado* (**35**, 4, p. 565) Article

A98-090 Estimation of Entry Parameters from Heat Flux Measurements. A. K. Alekseev, *ENERGIA Corporation, Russia*; and G. A. Pavlov, *Russian Academy of Sciences* (**35**, 4, p. 575) Engineering Note

A98-091 Unity Check Method for Structural Damage Detection. Cheng S. Lin, *The Aerospace Corporation* (**35**, 4, p. 577) Engineering Note

A98-092 Solar Array Degradation by Dust Impacts During Cometary Encounters. Ralph D. Lorenz, *University of Arizona* (**35**, 4, p. 579) Engineering Note

A98-093 Review and Extension of Computational Methods for Noncircular Cross-Sectional Weapons. F. G. Moore, R. M. McInville, and T. C. Hymer, *U.S. Naval Surface Warfare Center* (**35**, 5, p. 585) Survey Paper

A98-094 Navier–Stokes Predictions of the Individual Components of the Pitch-Damping Sum. Paul Weinacht, *U.S. Army Research Laboratory* (**35**, 5, p. 598) Article

A98-095 Numerical Simulation of a Supersonic Base-Bleed Projectile with Improved Turbulence Modeling. Petri Kaurinkoski and Antti Hellsten, *Helsinki University of Technology, Finland* (**35**, 5, p. 606) Article

A98-096 Integrated Solution for Computational Static Aeroelasticity of Rockets. Mordechay Karpel, *Technion—Israel Institute of Technology*; and Sara Yaniv and David S. Livshits, *Israel Military Industries* (**35**, 5, p. 612) Article based on AIAA Paper 96-4012 CP9611

A98-097 Three-Dimensional Flow Computation Around a Projectile Overtaking a Preceding Shock Wave. Rikio Watanabe, *Tokyo Noko University, Japan*; Kozo Fujii, *Institute of Space and Astronautical Science, Japan*; and Fumio Higashino, *Tokyo Noko University, Japan* (**35**, 5, p. 619) Article

A98-098 Physics of Resonance in a Supersonic Forward-Facing Cavity. Dale W. Ladoon, Steven P. Schneider, and John D. Schmisseur, *Purdue University* (**35**, 5, p. 626) Article

A98-099 Unsteady Effects of Dissociative Cooling Under High-Stagnation-Point Heat Loads. Benjamin P. Lacy, Philip L. Varghese, and Dennis E. Wilson, *University of Texas at Austin* (**35**, 5, p. 633) Article

A98-100 Effect of Magnetic Field on the Structure of High-Speed Flows. Justin Augustinus, Klaus A. Hoffmann, and Shigeki Harada, *Wichita State University* (**35**, 5, p. 639) Article

A98-101 Results from the Space Technology Research Vehicle 1a Atomic Oxygen Experiment. I. L. Harris, A. R. Chambers, and G. T. Roberts, *University of Southampton, England, UK* (**35**, 5, p. 647) Article

A98-102 Detailed Computation of Ultraviolet Spectra in Rarefied Hypersonic Flow. Koffi K. Kossi and Iain D. Boyd, *Cornell University* (**35**, 5, p. 653) Article

A98-103 Launch Vehicle Concept with Tandem Staging and Air Collection. James A. Martin, Brian T. Isaac, and Tryshanda Moton, *University of Alabama* (**35**, 5, p. 660) Article

A98-104 Optimal Performance of a Dual-Fuel Single-Stage Rocket. Guido Colasurdo, Dario Pastrone, and Lorenzo Casalino, *Turin Polytechnic Institute, Italy* (**35**, 5, p. 667) Article

A98-105 Minimum Heating Entry Trajectories for Reusable Launch Vehicles. Robert Windhorst and Mark Ardema, *Santa Clara University*; and Jeffrey Bowles, *NASA Ames Research Center* (**35**, 5, p. 672) Article

A98-106 Analysis and Design of the Aerocapture Tether with Accounting for Stochastic Errors. Steven G. Tragesser and James M. Longuski, *Purdue University* (**35**, 5, p. 683) Article

A98-107 Whole-Spacecraft Passive Launch Isolation. Paul S. Wilke and Conor D. Johnson, *CSA Engineering, Inc.*; and Eugene R. Fosness, *U.S. Air Force Research Laboratory* (**35**, 5, p. 690) Article based on AIAA Paper 97-1199 CP973

A98-108 Calibration of Accelerometers for the Measurement of Microvibrations. Julián Santiago-Prowald, Francisco J. Reina-Barragán, and Ángel Sanz-Andrés, *Universidad Politécnica de Madrid, Ciudad Universitaria, Spain*; and Luis Muñoz-Sevilla, *Construcciones Aeronáuticas S. A., Spain* (**35**, 5, p. 695) Article

A98-109 Impact of a Distributed Architecture for Space-Based Radar. Douglas P. Wickert, Graeme B. Shaw, and Daniel Hastings, *Massachusetts Institute of Technology* (**35**, 5, p. 703) Article

A98-110 Spacecraft Momentum Dumping Using Gravity Gradient. Donald Tong, *The Boeing Company* (**35**, 5, p. 714) Article

A98-111 Optimization of Global Positioning System Usage for Low-Power Satellites. Curtis W. Potterveld and Jordi Puig-Suari, *Arizona State University* (**35**, 5, p. 718) Engineering Note based on AIAA Paper 96-3653 CP969

A98-112 Analysis of a Canister Projectile System. S. Krishnan, *Indian Institute of Technology (Madras)* (**35**, 5, p. 721) Engineering Note

A98-113 Simplified Postbuckling Analysis for Axially Compressed Shells. Deng Keshun, *Dalian University of Technology, PRC*; and A. W. Davies and F. W. Williams, *Cardiff University, Wales, UK* (**35**, 5, p. 724) Engineering Note

A98-114 Hypersonic Blunt-Body Flows in Hydrogen–Neon Mixtures. R. J. Stalker and B. P. Edwards, *Universtity of Queensland, Australia* (**35**, 6, p. 729) Article based on AIAA Paper 98-0799

A98-115 Aerodynamic Heating Measurement on Afterbody of Hypersonic Flight Experiment. Keisuke Fujii and Yasutoshi Inoue, *National Aerospace Laboratory, Japan* (**35**, 6, p. 736) Article

A98-116 Effects of Mach Number on Supersonic Wraparound Fin Aerodynamics. Thomas C. McIntyre, *U.S. Air Force Institute of Technology*; Rodney D. W. Bowersox, *University of Alabama*; and Larry P. Gross, *Innovative Scientific Solutions, Inc.* (**35**, 6, p. 742) Article

A98-117 Aerodynamic Interference for Hypersonic Missiles at Low Angle of Attack. H. F. Nelson and Derek G. Hillstrom, *Uni-*

versity of Missouri–Rolla (**35**, 6, p. 749) Article based on AIAA Paper 98-0680

A98-118 **Evaluating Aerodynamic Characteristics of Wind-Tunnel Models Produced by Rapid Prototyping Methods.** A. Springer, *NASA Marshall Space Flight Center* (**35**, 6, p. 755) Article

A98-119 **Efficient Solution of Spacecraft Thermal Models Using Preconditioned Conjugate Gradient Methods.** C. K. Krishnaprakas, *ISRO Satellite Center, India* (**35**, 6, p. 760) Article

A98-120 **Launch Vehicle Trajectories with a Dynamic Pressure Constraint.** Sang-Young Park, *Texas A&M University* (**35**, 6, p. 765) Article

A98-121 **Minimum Heat Input Optimal Skip Entry into Venus Atmosphere.** A. Marinescu and S. Ilin, *National Institute of Aerospace Research, Romania* (**35**, 6, p. 774) Article based on AIAA Paper 97-3664 CP9711

A98-122 **Real-Time Optimal Attitude Estimation Using Horizon Sensor and Magnetometer Data.** Steven M. Hill and Todd J. McCusker, *Space Industries, Inc.* (**35**, 6, p. 778) Article

A98-123 **Optimization of a Space Transportation System Including Design Sensitivities.** V. Engler, D. Coors, and D. Jacob, *Technical University of Aachen, Germany* (**35**, 6, p. 785) Article

A98-124 **New Navigation Satellite System Based on Intermediate Circular Orbits.** G. Perrotta and S. Di Girolamo, *Alenia, Italy* (**35**, 6, p. 792) Article based on AIAA Paper 97-3603 CP9710

A98-125 **Mass Spectrometric Analysis of Reaction Products of Fast Oxygen Atoms-Material Interactions.** Bertrand Cazaubon, Alain Paillous, and Jean Siffre, *ONERA–CERT, France*; and Roger Thomas, *Laboratoire de Physique et Chimie de l'Environement, France* (**35**, 6, p. 797) Article

A98-126 **Arcing on Aluminum Anodized Plates Immersed in Low-Density Plasmas.** B. V. Vayner, C. V. Doreswamy, D. C. Ferguson, J. T. Galofaro, and D. B. Snyder, *NASA Lewis Research Center* (**35**, 6, p. 805) Article

A98-127 **Flush Air Data System Calibration Using Numerical Simulation.** Ian A. Johnston and Peter A. Jacobs, *University of Queensland, Australia*; and Takayuki Shimoda, *National Space Development Agency, Japan* (**35**, 6, p. 812) Article

A98-128 **Spacecraft Environment and Effects Monitoring Instrumentation for Small Satellites.** Prakash B. Joshi, Mark R. Malonson, and B. David Green, *Physical Sciences, Inc.*; Jack McKay, *Research Support Instruments*; David Brinza, *Jet Propulsion Laboratory, California Institute of Technology*; and Graham Arnold, *The Aerospace Corporation* (**35**, 6, p. 821) Article

A98-129 **Approach to Space Shuttle Main Engine Health Monitoring Using Plume Spectra.** Daniel A. Benzing and Kevin W. Whitaker, *University of Alabama* (**35**, 6, p. 830) Article

A98-130 **Space Power Technology in Power Management and Distribution Electronics.** Kitt C. Reinhardt and Clay S. Mayberry, *U.S. Air Force Research Laboratory*; and Dave S. Glaister, *The Aerospace Corporation* (**35**, 6, p. 837) Article

A98-131 **Spacecraft Potential Control by the Plasma Source Instrument on the POLAR Satellite.** R. H. Comfort, *University of Alabama in Huntsville*; T. E. Moore, *NASA Goddard Space Flight Center*; P. D. Craven, *NASA Marshall Space Flight Center*; C. J. Pollock, *Southwest Research Institute*; F. S. Mozer, *University of California, Berkeley*; and W. S. Williamson, *Hughes Research Laboratories, Inc.* (**35**, 6, p. 845) Engineering Note

A98-132 **Computational Prediction of Pitch Damping for Supersonic Blunt Cones.** D. K. Ludlow and N. Qin, *Cranfield College of Aeronautics, England, UK* (**35**, 6, p. 849) Engineering Note based on AIAA Paper 98-0394

A98-133 **Space Shuttle Family: Shuttle II, Mini Shuttle, and Micro Shuttles.** Frederick W. Boltz, *NASA Ames Research Center* (**35**, 6, p. 852) Engineering Note

A98-134 **Critical Need for a Swingby Return Option for Early Manned Mars Missions.** James Evans Lyne and Lawrence W. Townsend, *University of Tennessee* (**35**, 6, p. 855) Engineering Note

A98-135 **Performance Analysis for International Space Station Wireless Local Area Network.** Shian U. Hwu, John P. Boster, and Yin-Chung Loh, *Lockheed Martin Space Mission Systems and Services* (**35**, 6, p. 856) Engineering Note

A98-136 **Multipath Effects on International Space Station Global Positioning System Performance.** Shian U. Hwu, *Lockheed Martin Space Mission Systems and Services*; and Susan F. Gomez and Robert J. Panneton, *NASA Johnson Space Center* (**35**, 6, p. 858) Engineering Note

Books Reviewed During 1998

Venus Revealed—A New Look Below the Clouds of Our Mysterious Twin Planet, by David H. Grinspoon, *Addison–Wesley* (35, 1, p. 119); reviewed by Earl A. Thornton.

Atlas of Venus, by Peter Catermole and Patrick Moore, *Cambridge University Press* (35, 1, p. 119); reviewed by Earl A. Thornton.

Venus II—Geology, Geophysics, Atmosphere, and Solar Wind Environment, edited by S. W. Bougher, D. M. Hunten, and R. J. Phillips, *University of Arizona Press* (35, 1, p. 119); reviewed by Earl A. Thornton.

A New Force at a New Frontier, by Kevin Madders, *Cambridge University Press* (35, 3, p. 416); reviewed by Earl A. Thornton.

The Peenemünde Wind Tunnels—A Memoir, by Peter P. Wegener, *Yale University Press* (35, 1, p. 727); reviewed by Earl A. Thornton.
